Oya Yansa (Danielle)

Danielle has a Master's Degree in Social Work from the University of Southern California . And after years of working in her field she became increasingly disillusioned with traditional talk therapy techniques and the bureaucratic rules in the social work system. The Youth in the program would obtain jobs but were not able to keep them long or grasp skills necessary to move on to better employment. They oftentimes had unhealthy relationships mirroring the people who abused them as children or no relationships at all.

Danielle created her own system for these youth by combining, several different self-improvement, Law of Attraction, alternative health and other metaphysical techniques she had perfected for herself over the years.

These youth responded by seeing these unhealthy patterns in a different way, improving their lives often rather quickly. This was the confirmation she needed to help more youth at a deeper, more profound level.

To do this, she made the hard choice of leaving the traditional social work field, finding the "Path" through the IFA Foundation, developing a closer relationship to the Orisas and acquiring a Level II Usui Reiki attunement. Reiki is a healing system used to increase awareness, insight, wisdom and personal growth. Danielle now combines her training as an Oya Priestess and the ase` of the Orisas with Reiki, as part of a powerful daily tool to heal herself and others.

Priestess of Oya
